The crochet yarns that we have used for our works are very fine and the yarn numbers indicated in this magazine are available in specialized knitting and crochet stores. The same yarn numbers are used by all the leading brands. The finer the yarn, the higher the yarn number. For example no. 40 is finer than no. 30.

The crochet hooks used are equally fine and their numbers change with different brands. The hook numbers used in this book are metric which is most widely used throughout the world. To eliviate any confusion, English equivalents are also given.
